

BGS Corner — image specifications

Every image region in the storefront, with its rendered size at desktop (1440px) and mobile (375px). No photography exists yet; these are the slots waiting for it. Supply at 2× the desktop figure for retina.

Slot	Where	Desktop	Mobile	Ratio	Supply at 2×
Hero banner	Home — carousel, 5 slides	1318 × 340	341 × 275	31:8	2636 × 680
Product card	Home rails — 4-up	301 × 301	164 × 164	1:1	602 × 602
Product card	Home — Reserve, 3-up feature	407 × 407	341 × 341	1:1	814 × 814
Product card	Collection grid — 4x3	230 × 230	164 × 164	1:1	460 × 460
Product card	Gift box — slots	276 × 276	164 × 164	1:1	552 × 552
Product card	Gift box — picker	202 × 202	164 × 164	1:1	404 × 404
PDP main image	Product page — gallery	535 × 535	343 × 300	1:1	1070 × 1070
PDP thumbnail	Product page — under the main image	78 × 82	58 × 58	20:21	156 × 164
Cart line	Cart, checkout	76 × 76	62 × 62	1:1	152 × 152
Promo banner	Home — promo row	74 × 60	58 × 48	21:17	148 × 120

Notes on each slot

Hero banner Home — carousel, 5 slides

Full width of the inset banner. Crops to fill; keep the subject off the left third, the copy sits there.

Product card Home rails — 4-up

Square. Same asset serves every rail; the grid changes, the ratio does not.

Product card Home — Reserve, 3-up feature

Square. Largest card render; supply at this size or above.

Product card Collection grid — 4x3

Square. Smallest card render.

Product card Gift box — slots

Square.

Product card Gift box — picker

Square.

PDP main image Product page — gallery

Square on desktop, capped at 300px tall on mobile so the buy box stays near the fold.

PDP thumbnail Product page — under the main image

Four per product: three stills and one video still.

Cart line Cart, checkout

Square. Reuse the product card asset.

Promo banner Home — promo row

Small inline mark, not a scene. Landscape.

How many images to shoot

Render slots are not assets. One square photograph per product serves the home rails, the collection grid, the gift-box picker and the cart line — it is shot once and reused. The thumbnails under the gallery are the same four gallery assets at a smaller size, not extra images. What follows is the number of distinct photographs.

Ratio	Slot	Distinct images	What each one is
31:8	Hero banner	5	One per carousel slide
1:1	Product card	34	One per product, reused across every grid and the cart
1:1	PDP gallery, extra views	99	Three more per product beyond the card shot — 33 products
1:1	PDP video still	33	One per product, the fourth thumbnail
21:17	Promo banner	3	Build a gift box, Discovery 3 ml, Corporate gifting
20:21	PDP thumbnail	0	No new asset — the four gallery images, rendered small

Two ways to scope the shoot

Minimum to launch	42 photographs	5 hero + 34 product cards + 3 promo. Every page renders correctly; the PDP gallery shows one image instead of four.
Full build	174 photographs	Adds 99 extra gallery views and 33 video stills, so every product has a four-up gallery.

The 34 products are 12 oud oils (11 named plus a seasonal slot), 2 Reserve, 5 bakhoor, 9 EDP sprays and 6 gift sets. The seasonal slot has no product behind it yet, so 33 of the 34 are real today.

Format and delivery

Format. AVIF or WebP with a JPEG fallback. The brief sets a hero poster ceiling of 1.5 MB and a per-template JS budget of 300 KB gzipped.

Colour. Product shots on a dark ground read correctly against the light page; that contrast is what the layout assumes.

Alt text is required at upload — the brief makes it a publishing condition, not a nicety.

Cropping. Every card slot is square and crops to fill. Centre the bottle and leave even margin; anything near an edge will be cut on one breakpoint or another.

The hero is the exception — it is landscape and crops hardest. Its left third carries the headline and buttons on both desktop and mobile, so keep that area quiet.

Still missing from the source sheets

- No photography of any kind — every slot above is empty.
- Product picture column in BGS_Perfume_Product_Details.xlsx reads “[Picture not provided]” on all nine sprays.
- Bottle size in ml is not given for any spray; 50 ml on the site comes from the build brief, not the sheet.
- Arabic names are marked not provided on all nine.
- The oud oils and bakhoor have no unit counts — the Units column in BGS Corner Sheet.xlsx is blank for all 30 rows.
